

Known Issues and Workarounds
NIH NOT-OD-09-056 and NIH NOT-0D-09-060 Form Sets

None of these issues is deemed to significantly hamper usability – but they may be annoying for users. Please send this list and suggested workarounds to others to whom you send the form sets.

Issues in bold are ones you should expect will occur. The remaining items are ones that will occur only in the special circumstances indicated below.

Update Date	09-056 Set	09-060 Set	LOCATION IN FORM SET Issue	Workaround
4/3/09	X	X	COVER PAGE – Tab stop for PD/PI Address goes to the end of field instead of highlighting the entire field	Manually position your cursor over the entire field and click to highlight that field, then add data.
4/3/09	X	X	COVER PAGE – Tab stop for Parent Grant Title field goes to the end of the field instead of highlighting the entire field	Manually position your cursor over the entire field and click to highlight that field, then add data.
4/3/09	X	X	FACE PAGE – The Parent Grant Title field does not carry over from the entry made on the Cover Page	Manually enter the parent grant title on the Face Page. This problem occurs because of differences in #s of characters for the title on the cover page (two lines, totaling 81 characters) versus the face page (one line, totaling 81 characters)
4/3/09	X	X	BIOSKETCH, RESEARCH PLAN – Unneeded blank pages	Follow instructions to delete pages (Attachment A of instructions) if you have Adobe Professional; otherwise, add note to PRF to ask SPA to delete pages for you.
4/3/09	X	X	HUMAN OR ANIMAL SUBJECT APPROVALS – Need to add a human or animal subject approval letter.	Follow instruction to add pages (Attachment B of instructions) if you have Adobe Professional; otherwise, add note to PRF to ask SPA to add these pages for you. Please send SPA hard copy, Word or PDF copies of the additional files that need to be added at the same time as the rest of your proposal.
4/3/09	X	X	ADDING ADDITIONAL BIOSKETCHES OR CONTINUATION PAGES (beyond those in the form set). NIH biosketches and continuation pages were not originally designed by NIH to be used in form sets because when more than one is added to a package, the field names are no longer unique. When the field names are not unique, info that is typed into one will automatically flow to all the others.	Add a note to the PRF to ask SPA to add the additional pages or documents for you. Send SPA hard copy, Word, or PDF copies of the additional files that need to be added at the same time as the rest of your proposal.
